SENIOR FRONTEND ENGINEER

Product-minded Software Engineer with 8+ years of experience building scalable, accessible, user-centered web applications and digital products. Expertise in frontend architecture, React, Next.js, TypeScript, Angular, Vue, and component-based application development. Combines strong UX/UI judgment with technical leadership across system design, reusable component systems, API integration, testing strategy, performance, and reliable production delivery.

TECHNICAL SKILLS

Frontend: React, Next.js, Angular, Vue.js, Vuetify, TypeScript, JavaScript, HTML5, CSS/SCSS, Tailwind CSS

Architecture & UI: Frontend Architecture, Micro-Frontends, Component Libraries, Design Systems, Responsive Design, Web Accessibility, Web Performance, OpenLayers

Quality & Delivery: Jest, React Testing Library, Unit Testing, Testing Strategy, Git, GitHub, Code Review, Agile Development

Backend & Integration: REST APIs, JSON, C#, .NET, Blazor Server

Leadership: Technical Leadership, System Design, Stakeholder Collaboration, Requirements Analysis, Technical Documentation

PROFESSIONAL EXPERIENCE

Design Interactive - Software Engineer

Remote | February 2024 - Present

- Build and maintain secure, scalable enterprise web applications supporting mission-critical government workflows and strict compliance requirements.
- Serve as Technical Lead for an Angular-based project, providing technical direction across application architecture, system design, implementation strategy, and testing approach.
- Define scalable frontend patterns and technical standards for component architecture, API integration, maintainability, security, quality, and long-term application evolution.
- Develop modular frontend capabilities using Vue.js, Vuetify, OpenLayers, SCSS/CSS, and micro-frontend architecture.
- Design and maintain reusable UI components, responsive experiences, and interactive geospatial/map-based features.
- Collaborate with stakeholders, product, QA, and engineering teams to translate complex requirements into technical designs, implementation plans, and reliable releases.
- Expand end-to-end delivery ownership through C# and Blazor Server development, integrating component-based UI solutions with backend services.
- Contribute to code-quality practices, testing strategy, architecture reviews, and Agile delivery processes.

Airship - Software Engineer

Remote | January 2022 - November 2022

- Developed and maintained 5+ responsive web applications using React, Next.js, TypeScript, JavaScript, HTML, CSS, and Tailwind CSS.
- Built reusable UI components and applied responsive-design, accessibility, performance, and maintainability best practices across customer-facing applications.
- Implemented unit and component tests with Jest and React Testing Library, helping achieve approximately 90% code coverage and contributing to a 50% reduction in reported defects.
- Collaborated with developers, designers, and product managers in Agile teams to translate requirements into high-quality features and deliver under tight timelines.
- Used Git-based workflows, code reviews, and shared engineering standards to support reliable releases and consistent code quality.

Power Home Remodeling – UI Engineer

Remote | May 2020 - January 2022

- Developed and maintained reusable React components for an internal design system using JavaScript, TypeScript, Redux, and SCSS.
- Partnered with design and engineering teams to improve UI consistency, usability, and adoption of shared interface patterns across applications.
- Expanded the design system with new components, documentation, and frontend best practices, helping reduce design inconsistencies by 20%.
- Improved component quality and performance through refactoring, reusable patterns, and maintainable styling practices, contributing to a 17% improvement in internal code-quality and performance metrics.
- Established consistent component APIs, state-management patterns, and styling standards to support scalable frontend delivery.

Darden Restaurants - Frontend Developer

Orlando, FL | June 2019 - April 2020

- Developed and executed A/B tests using JavaScript, jQuery, and Adobe Target, contributing to a 20% increase in revenue through data-informed experimentation and conversion optimization.
- Applied modern JavaScript practices and TypeScript typing to improve code reliability, maintainability, and implementation quality.
- Collaborated with design and digital teams to improve user experience and brand consistency, contributing to a 10% increase in client visits.
- Supported analytics implementation, test measurement, and Jest-based unit-testing efforts to validate releases and inform product decisions.

Visit Orlando - Frontend Developer

Orlando, FL | January 2018 - April 2020

- Refactored and optimized web-development workflows using HTML, JavaScript, and Agility CMS, improving development efficiency and supporting faster delivery cycles.
- Enhanced CMS-driven web pages with responsive UI improvements, purposeful animations, and SEO best practices, contributing to a 30% increase in site visits.
- Collaborated with cross-functional teams to troubleshoot issues, improve cross-browser compatibility, and contribute to an 8% reduction in reported defects.
- Maintained reliable, usable web experiences across desktop and mobile devices.

PROJECTS

Portfolio Website

Next.js, React, TypeScript, Tailwind CSS, Framer Motion, SendGrid

- Designed and developed a responsive portfolio platform to showcase frontend engineering, UI/UX, and product-development work.
- Implemented a modern Next.js architecture with reusable components, theme support, accessible responsive layouts, animations, and a SendGrid-powered contact workflow.
- Optimized the experience for usability, performance, and professional presentation across desktop and mobile devices.

EDUCATION

Bachelor of Science in Computer Science

Florida State University | Tallahassee, FL
